i-Kids[®] Seal – Restore – Light-cure – Fluoridate

The i-Kids program from Ivoclar Vivadent offers coordinated products for the preventive and restorative dental treatment of children of different age groups.

i-Kids Kit Seal & Fill

Helioseal[®] F

The sealant for pits and fissures

Pits and fissures are exposed to a high caries risk. Helioseal F protects these particularly susceptible areas by sealing them.

Tetric EvoCeram[®] Bulk Fill

The fast restoration

Cariou lesions can be easily and quickly restored with Tetric EvoCeram Bulk Fill.

Bluephase[®] Style

Polymerisation when treating children

The convenient Bluephase Style with Polywave[®] LED cures Helioseal F and Tetric EvoCeram Bulk Fill quickly and precisely.

Fluor Protector S

The protective varnish with fluoride

The protective fluoride varnish Fluor Protector S provides professional protection against dental caries and erosion.

Photos:

- 1 Fissure sealing with Helioseal F
- 2 Carious defects at teeth 84 and 85
- 3 Directly after restoring with Tetric EvoCeram Bulk Fill
- 4 Polymerization with Bluephase Style (Dr N. Bartling)
- 5 Application of Fluor Protector S
