Implant Care-Program

*Oral health management
for implant patients*

The features of the Implant Care products, such as material, delivery form, handling and application, are targeted at meeting the specific requirements of implant restorations.

Benefits of Implant Care:

- ▶ Providing care for complex structural elements
- ▶ Gentle to sensitive peri-implant tissue
- ▶ Maintaining function and esthetics
- ▶ Easy integration into the treatment sequence and practice routine
- ▶ Clinical experience in implant patients
- ▶ Contribution to the quality assurance
