

Centric Tray

A small step for dentists ...

... a giant leap for prosthetics

Centric Tray

The tray that has it all

effortlessly records the natural dimensions of the individual occlusal situation.

The Biofunctional Prosthetic System (BPS®) provides the prerequisites for brand name quality in removable denture prosthetics. The Centric Tray represents the ideal supplement to the system. It facilitates the determination of the intervestibular relation of your patients.

- Quick and easy handling
- Reliable determination of the centric relation
- Subsequent adjustments are reduced
- Reusable, hence time-saving and economical
- Underpins your expertise and helps you work even more efficiently
- For indications in both complete and partial denture prosthetics

Centric Tray
