Smile Finder

For a
as unique

For reasons of readability, all pronouns which in this brochure refer to the masculine form are pertinent to the feminine as well.

smile – as you are

Your smile should match your face and enhance your personality – no matter whether you are wearing partial or complete dentures.

You can choose the smile you want thanks to the individualized denture teeth of the SR Vivodent® S PE and SR Vivodent® S DCL range. Look through the following pages for inspiration and discuss your choice with your dentist. He will be happy to give you comprehensive advice.

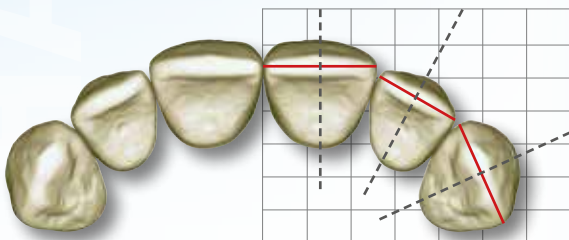

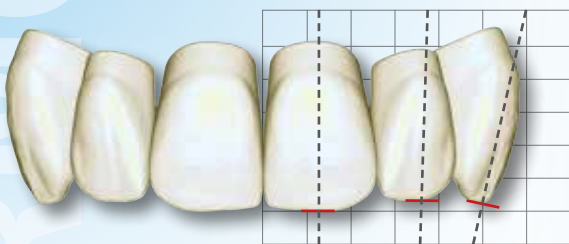

What makes a smile beautiful

Your smile is as unique as you are. An attractive smile depends to a large extent on what is known as the smile line. The smile line is defined as the line between the curvature of the upper front teeth and the curvature of the bottom lip during smiling.

SR Vivodent® S PE|S DCL

HARMONIOUS

If you opt for a harmonious tooth setup, the teeth are placed in the dental arch without creating any distinctive effects. The slightly shorter lateral incisors result in a deliberately natural smile.

DOMINANT

Dominant denture designs are characterized by the emphasis given to the central incisors and canines. To achieve this effect, the lateral incisors are noticeably shorter and slightly inclined towards the centre.

BOLD

Bold denture designs create a rather impressive overall appearance: The entire front is slightly nested. The central incisors are given additional emphasis by being rotated a touch towards the outside.

DYNAMIC

Dynamic setups are achieved by shifting the axis of the incisors and inclining them towards the front. Additional effect is created by varying the vertical incisal edge of the teeth.
