EMERGENCY OVERVIEW

This information is based on findings from related or similar materials.

- Wax in molten form may cause thermal burns.

Potential Health Effects, Signs and Symptoms of Exposure:

Primary Route of Entry

Eye	Fumes from molten product may cause irritation. Contact with molten product may cause severe thermal burns.
Skin	Contact with molten wax may cause severe thermal burns.
Ingestion	Low order of acute systematic toxicity.
Inhalation	Product dust may cause respiratory tract irritation. Molten wax may cause irritation to the respiratory tract.
Sub-Chronic Effects	None in our experience under normal conditions of handling and use.

NOTE: Refer to Section 11, Toxicological Information for Details

This product is not a hazardous chemical as defined by the OSHA Hazard Communication Standard, CFR Title 29 1910.1200. The precise composition of this mixture is proprietary information. A more complete disclosure will be provided to a physician or nurse in the event of a medical emergency.

Section 4 - First Aid Measures

First Aid for Eye	Ambient wax – flush wax particles with tepid water. Hot wax – seek medical attention.
First Aid for Skin	Ambient wax – wash with soap and water. Molten wax – cool wax immediately – do not remove wax from skin. Seek medical attention.
First Aid for Inhalation	When fume or mist occurs remove to fresh air. If person is not breathing provide oxygen or artificial respiration. Seek medical attention.
First Aid for Ingestion	Small quantities – permit to pass through system. Large quantities – seek medical attention.

Section 5 - Fire Fighting Measures

Flash Point (°F/°C)	Flammable Limit (vol%)	Auto-ignition Temperature (vol%)
>200°C/>392°F	LEL: N/A UEL: N/A	N/D

Method:	COC, ASTM D-92 method.
Extinguishing Media:	Use water fog, foam, dry chemical or CO ₂ . Do not use a direct stream of water.
Fire Fighting Instructions:	Firefighters should wear proper protective equipment and self-contained breathing apparatus with full-face piece in positive pressure mode. Move containers from fire area if it can be done without risk. Use water to keep fire-exposed containers cool.
Unusual Hazards:	As with most solid or particulate organic material, extremely high dust concentration in air may result in a potential fire hazard. Good housekeeping practices will prevent any significant accumulations.

Section 6 - Accidental Release Measures

Spill or Release Procedures Sweep up material and place in appropriate disposal container. If molten wax- contain spill as much as possible and let molten wax cool. Once solid, place material in appropriate disposal container.

Section 7 - Handling and Storage

Handling Follow all MSDS/label precautions even after container is emptied because they may retain product residues.
Storage Store in cool, dry place away from heat, sparks, flame and direct sunlight.
Explosion Hazard May burn although not readily ignitable.

Section 8 - Exposure Controls / Personal Protective Equipment

Engineering Controls Good ventilation should be sufficient to control airborne levels. Do not let molten product stand unused in melt tanks and injection machines. Stir molten product at all times.

Personal Protective Equipment

General Provide exhaust ventilation sufficient to keep the airborne concentration of this product below its exposure limits. Exhaust air may need to be cleaned by scrubbers or filters to reduce environmental contamination.
Eye/ Face Protection Safety glasses with side shields (or goggles) and a face shield.
Skin Protection Ambient wax – cotton gloves. Molten wax – impervious heat protective gloves.
Respiratory Protection Normally none required. For mist and fumes use approved NIOSH/MSHA organic respirator.
