

### SAFETY DATA SHEET (GHS)

Issue Date:	31.03.2019
Version:	1.0.1
Revision Date:	31.03.2024
Print Date:	31.03.2019

### 1. IDENTIFICATION OF THE SUBSTANCE/MIXTURE/PRODUCT AND MANUFACTURER/IMPORTER

1.1 Product identifier:-Product name: Syntac Adhesive Product number: 532891AN / 532892AN / 628320AN 1.2 Other means of identification:-Not applicable. Recommended use of the chemical and restrictions on use:-1.3 Not applicable. Identified uses: Enamel-Dentin Bonding Agent. Details of the manufacturer and importer:-1.4 Ivoclar Vivadent AG Manufacturer: Bendererstrasse 2 FL-9494 Schaan Principality of Liechtenstein Tel: + 423 235 35 35 Fax: + 423 235 33 60 Importer: Ivoclar Vivadent Ltd 12 Omega St, Rosedale, Auckland, New Zealand Phone +64 9 914 9999 Fax +64 9 914 9990 www.ivoclarvivadent.co.nz 0800 764 766 (National Poison Centre) 1.5 **Emergency phone number:** Poisons Hotline (24 hours / 7 days)

### 2. HAZARD(S) IDENTIFICATION

#### 2.1 GHS Classification:-

Skin Irrit. 2 H315 Causes skin irritation.
Eye Dam. 1 H318 Causes serious eye damage.
Resp. Sens. 1 H334 May cause allergy or asthma symptoms or breathing difficulties if inhaled.
Skin Sens. 1 H317 May cause an allergic skin reaction.
STOT SE 3 H335 May cause respiratory irritation.

2.2 GHS Label elements, including precautionary statements:-Hazard Pictogram:

Signal word: Hazard-determining components of labelling: Hazard statements:

**Precautionary statements:** 

GHS05

Polyethylene glycol dimethacrylate

H315 Causes skin irritation.

Danger

Glutaral

H318 Causes serious eye damage.
H334 May cause allergy or asthma symptoms or breathing difficulties if inhaled.
H317 May cause an allergic skin reaction.
H335 May cause respiratory irritation.
P261 Avoid breathing dust/fume/gas/mist/vapours/spray.

P280 Wear protective gloves/protective clothing/eye protection/face protection.

P342+P311 If experiencing respiratory symptoms: Call a POISON CENTER/doctor.

P304+P341 IF INHALED: If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing. P333+P313 If skin irritation or rash occurs: Get medical advice/attention.

#### Additional information:

Medical devices as defined in Directive 93/42/EEC and which are invasive or used in direct physical contact

with the human body, are exempted from the provisions of Regulation (EC) No 1272/2008 (CLP/GHS) usually if they are in the finished state and intended for the final user.

#### Other hazards:-2.3

Results of PBT and vPvB assessment:-	PBT:	Not applicable.
	vPvB:	Not applicable.

#### 3 **COMPOSITION/INFORMATION ON INGREDIENTS**

Ingredient name	CAS No.	Classification	Concentration
Polyethylene glycol dimethacrylate	25852-47-5	Skin Irrit. 2 - H315 Eye Irrit. 2 - H319 STOT SE 3 - H335	25-50%
Glutaral	111-30-8	Acute Tox. 3 - H301 Acute Tox. 3 - H331 Resp. Sens. 1 - H334 Skin Corr. 1B - H314 Aquatic Acute 1 - H400 Skin Sens. 1 - H317	3-<10%
Non-hazardous ingredients	N/A	N/A	to 100%

For the full text of the H-Statements mentioned in this Section, refer to Section 16.

#### **FIRST AID MEASURES** 4.

#### 4.1 Description of necessary first aid measures:-

. 1	Description of necessary first ald measure	5
	General advice:	Remove contaminated clothing and shoes immediately and launder thoroughly before reusing. First aid facilities include first aid rooms and medical centres.
		If a risk assessment determines that a first aid room or medical centre is not needed, a rest area within the workplace may be suitable to assist an injured or ill person.
	If inhaled:	Ensure supply of fresh air or oxygen – seek medical attention immediately. If required, provide artificial respiration.
		Remove affected person from the immediate area. Keep patient warm.
		In case of unconsciousness place patient stably in side position for transportation.
	In case of skin contact:	Wash off immediately with water. If skin irritation continues, consult a doctor.
	In case of eye contact:	Remove contact lenses, irrigate copiously with clean, fresh water for at least 15 minutes holding the eyelids apart and seek medical attention immediately.
	If swallowed:	Do not induce vomiting. Rinse mouth thoroughly with water. Let plenty of water be drunk in small gulps. Never give anything by mouth to an unconscious person. Seek medical attention immediately.

- 4.2 Symptoms caused by exposure:-
- 5. FIRE FIGHTING MEASURES
- 5.1 Suitable extinguishing equipment:-Suitable extinguishing media:

Unsuitable extinguishing media: Specific hazards arising from the

5.2 substance/mixture/product

5.3 Special personal protective equipment:

Please refer to section 2.2 and section 11.

CO2, powder or water spray. Fight larger fires with water spray or alcohol resistant foam. Water with full iet No further relevant information available.

Cool endangered receptacles with water spray.

Special protective equipment and precautions for fire fighters:-Mouth respiratory protective device. Wear self-contained respiratory protective device.

**Precautions:** 

#### 6. ACCIDENTAL RELEASE MEASURES

- 6.1 Personal precautions, protective equipment and emergency procedures:-Wear protective equipment. Keep unprotected persons away. Use of suitable equipment (incl PPE) to prevent contamination of skin, eyes, clothing, removal of ignition sources, ventilation, emergency procedures (eq. evacuate, consult expert).
- 6.2 **Environmental precautions:-**Dilute with plenty of water. Do not allow to enter sewers/ surface or ground water.
- 6.3 Methods and materials for containment and cleaning up:-Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust). Dispose contaminated material as waste according to item 13. Ensure adequate ventilation.
- Reference to other sections:-6.4 See Section 7 for information on safe handling. See Section 8 for information on personal protection equipment. See Section 13 for disposal information.

#### HANDLING AND STORAGE 7.

#### 7.1 Precautions for safe handling:-

Only adequately trained personnel should handle this product. For use in dentistry only. Ensure good ventilation/exhaustion at the workplace. Open and handle receptacle with care. Keep ignition sources away – do not smoke. Wash hands before breaks and after work. Do not eat, drink or smoke during work time. Remove soiled or soaked clothing immediately. Keep away from foodstuffs and beverages.

7.2 Conditions for safe storage, including any incompatibilities:-Store only in original container. Information about storage in one common storage facility: No further relevant information available. Further information about storage conditions: Keep container tightly sealed. Protect from exposure to the light. Protect from heat and direct sunlight. Containers which are opened must be carefully closed and kept upright to prevent leakage.

Store in cool, dry conditions in well-sealed receptacles. Store receptacle in a well ventilated area. Recommended storage temperature for storage rooms and vessels is 20 - 30°C.

#### 7.3 Specific end use:-

No further relevant information available.

### 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

### 8.1 Exposure control measures:-

Component	CAS No.	Value	Parameters	Basis
Component	CAS NO.	value	i arameters	Dasis
Glutaral	111-30-8	Short-term value: 0.2 mg/m <sup>3</sup> Long-term value: 0.2 mg/m <sup>3</sup>	0.05 ppm 0.05 ppm	The lists valid during the making were used as basis.

Exposure should be kept to as low as practicable and below the AOES.

### 8.2 Biological monitoring:-

Assess in accordance with exposure limits – please refer to section 8.1.

**Exposure controls / Personal protective equipment / General protective and hygienic measures:** Usual hygienic measures for dental practice and dental laboratories. Immediately remove all soiled and contaminated clothing.

Keep away from foodstuffs, beverages and feed.

Wash hands before breaks and at the end of work.

Store protective clothing separately.

Avoid contact with the eyes and skin.

Do not inhale gases / fumes / aerosols.

### 8.3 Control banding:-

Use good industrial hygiene practice and general ventilation.

#### 8.4 Engineering controls:-

In case of intensive contact, wear protective gloves (EN 374). Before use, the protective gloves should be tested in any case for its specific work-station suitability (i.e.

mechanical resistance, product compatibility and antistatic properties).

Adhere to the manufacturer's instructions and information relating to the use, storage, care and replacement of protective gloves.

Protective gloves shall be replaced immediately when physically damaged or worn.

### 8.5 Individual protection measures include PPE:-

Eye/face protection:

Skin protection:

Safety glasses

**Protective gloves** After use of gloves apply skin-cleaning agents and skin cosmetics.

Use tightly fitting safety glasses as per Australian

Standard AS 1336 and AS/NZS 1337.

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.

Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation.

Material of gloves         Butly fubber, BR.         Fluorocarbon rubber (Viton).         PVA gloves.         The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material cannot be calculated in advance and has therefore to be checked prior to the application. Penetration time of glove material The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.         Respiratory protection:       Provide for good ventilation of working area (local exhaust ventilation, if necessary). In case of brief exposure or low pollution use respiratory filter device.         9.       PHYSICAL/CHEMICAL PROPERTIES         9.1       Physical/chemical proporties:-         9.1       Colour:         0       Colour:         0 <td< th=""><th></th><th></th><th></th></td<>			
Fluörocarbon rubber (Viton).         PVA gloves.         The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer. As the product is a preparation of several substances, the resistance of the glove material cannot be calculated in advance and has therefore to be checked prior to the application. Penetration time of glove material The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.         Provide for good ventilation of working area (local exhaust ventilation, if necessary).       In case of brief exposure or low pollution use respiratory filter device.         In case of brief exposure or low pollution use respiratory filter device.       No further relevant information available.         9.       PHYSICAL/CHEMICAL PROPERTIES 9.1       Information on physical/chemical properties:- 0 Colour:         0       Colour:       Colouriess.         0       Colour threshold:       Not determined.         0       Odour threshold:       Not determined.         1       Indetermined. #### 10. STABILITY AND REACTIVITY

10.1 Reactivity:-No further relevant information available.

10.2 Chemical stability:-

Stable under normal handling and storage conditions.

	Thermal decomposition / conditions to be avoided:	
10.3	No decomposition if used according to specific	cations.
10.5	Possibility of hazardous reactions:- No dangerous reactions known.	
10.4	Conditions to avoid:-	
10.4	No further relevant information available.	
10.5	Incompatible materials:-	
	No further relevant information available.	
10.6	Hazardous decomposition products:-	
	None under normal conditions of storage and	use.
11.	TOXICOLOGICAL INFORMATION	
11.1	Information on toxicological effects:-	
	Acute toxicity:	
	LD/LC50 values relevant for classification:	
	Glutaral 111-30-8	Oral LD50 134 mg/kg (rat) Dermal LD50 2560 mg/kg (rabbit)
	Skin corrosion/irritation:	Irritant to skin and mucous membranes.
	Serious eye damage/eye irritation:	Strong irritant with the danger of severe eye injury.
	Respiratory or skin sensitization:	Sensitisation possible through inhalation.
		Sensitisation possible through skin contact.
	Germ cell mutagenicity:	No further relevant information available.
	Carcinogenicity:	No further relevant information available.
	Reproductive toxicity:	No further relevant information available.
	Specific target organ toxicity - single	No further relevant information available.
	exposure:	
	Specific target organ toxicity - repeated	No further relevant information available.
	exposure: Aspiration hazard:	No further relevant information available.
	Additional information:	No further relevant information available.
11.2		
	Short Term (Acute) Exposure:	No further relevant information available.
	Swallowed:	No further relevant information available.
	Eyes:	Strong irritant with the danger of severe eye injury.
	Skin:	Irritant to skin and mucous membranes.
	Inhaled:	Sensitisation possible through inhalation.
	Long Term (Chronic) Exposure:	
	Swallowed:	No further relevant information available.
	Eyes:	Strong irritant with the danger of severe eye injury.
	Skin:	Irritant to skin and mucous membranes.
44.2	Inhaled:	Sensitisation possible through inhalation.
11.3	Early onset symptoms related to exposure:-	
11.4	•	No further relevant information available.
11.4		No further relevant information available.
11.6	•	No further relevant information available.
11.7		No further relevant information available.

## 12. ECOLOGICAL INFORMATION

**12.1 Ecotoxicity:-**No further relevant information available.

12.2 Persistence/degradability:-No further relevant information available. 12.3 Bioaccumulative potential:-No further relevant information available. 12.4 Mobility in soil:-No further relevant information available. 12.5 Other adverse effects:-No further relevant information available. Additional ecological information / General notes: Do not allow product to reach ground water, water course or sewage system, even in small quantities. 12.6 Other adverse effects:-No further relevant information available. **DISPOSAL CONSIDERATIONS** 13. 13.1 Disposal methods:-Must not be disposed together with household garbage. Do not allow product to reach sewage system.

Residuals must be removed from packaging and when emptied completely disposed of in accordance with the regulations for waste removal.

Incompletely emptied packaging must be disposed of in the form of disposal specified by the regional disposer.

Disposal must be made according to official regulations.

Take to an approved landfill or a waste incineration plant, under conditions approved by the local authority.

### 14. TRANSPORT INFORMATION

UN number ADR / IMDG / IATA:-	Void.
UN proper shipping name or technical name:-	
ADR:	Void.
IMDG, IATA:	Void.
Transport hazard class(es):	Void.
Label:	Void.
Void.	Void.
Environmental hazards:	Not applicable.
Special precautions for user:	Not applicable.
Danger code:	Void.
EMS Number:	Void.
Segregation groups:	Not applicable.
Transport in bulk according to Annex II of	Not applicable.
MARPOL73/78 and the IBC Code:	
Transport/Additional information:	Product is not classified as a dangerous good for transport.

#### 15. REGULATORY INFORMATION

# 15.1 Safety, health and environmental regulations/legislation specific for the substance/mixture/product:-

Classified as Hazardous according to the criteria of the National Occupational Health and Safety Commission (NOHSC) approved criteria for the classifying hazardous substances [NOHSC: 1008] 3rd edition.

Standard for the Uniform Scheduling of Medicines and Poisons.

Carcinogen classification under WHS Regulation 2011, Schedule 10.

Notification status in accordance with section 3 and current national legislation.

HSNO Approval: HSR007183

### EPA NZ Classes of hazardous properties:

Classification 6.1E (All) Substances that are acutely toxic – May be harmful, aspiration hazard Classification 6.1E (I)

Classification 6.3A Substances that are irritating to the skin Classification 6.4A Substances that are irritating to the eye Classification 6.5A Substances that are respiratory sensitisers Classification 6.5B Substances that are contact sensitisers Classification 6.9B (All) Substances that are harmful to human target organs or systems Classification 9.1D (All) Substances that are slightly harmful to the aquatic environment or are otherwise designed for biocidal action Classification 9.1D (C) Classification 9.1D (A)

Classification 9.2C Substances that are harmful in the soil environment Classification 9.3C Substances that are harmful to terrestrial vertebrates

### 16. OTHER INFORMATION

Key to abbreviations/acronyms used in SDS:-

H301 Toxic if swallowed.

H314 Causes severe skin burns and eye damage.

H315 Causes skin irritation.

H317 May cause an allergic skin reaction.

H319 Causes serious eye irritation.

H331 Toxic if inhaled.

H334 May cause allergy or asthma symptoms or

breathing difficulties if inhaled.

H335 May cause respiratory irritation. H400 Very toxic to aquatic life.

#### Key literature references/data sources used to compile SDS:-

Standard EN420:2003 General requirements for protective gloves: disposable gloves, e.g. nitrile rubber, material thickness 0.1 mm (Australian Standard 2161).

Long-term exposure (Level 6: < 480 min): protective gloves, e.g. nitrile rubber, material thickness 0.7 mm (Australian Standard 2161).

Personal eye protection - Eye and face protectors for occupational applications: safety glasses (Australian Standard AS 1336 and AS/NZS 1337.1:2010).
